Art Unit: 1714

Applicant's amendment as submitted on 11/19/2004 incorporated new limitation in the claim, which comprises the amount of the glass fibers. In view of the above following office action is final as necessitated by amendment.

***Claim Rejections - 35 USC § 103***

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 1, 2, 4, 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over SCHOLL (US 6,025,415) in view of YAGI (JP 2000178379).

The discussion of the disclosure of the prior art of SCHOLL and YAGI from paragraph 3 of the office action mailed on 8/20/2004 is incorporated here by reference.

In the response and argument mailed on 11/19/2004 the applicants addressed following issues:

a) The prior art of SCHOLL and YAGI do not teach the amounts of glass fibers required by the present invention:

With respect to the above argument, the examiner respectfully disagrees. The prior art of SCHOLL teaches use of oxidic and siliceous fillers. Glass fibers are listed and clearly envisaged in that list. The amount of the oxidic and siliceous fillers is in a range of 0.5-150 pbw of rubber,

which also apply to the glass fibers of SCHOLL. This further clearly encompasses the amounts in the present invention.

b) The examiner appears to be using hindsight reconstruction to arrive at the instant invention.

In response to applicant's argument that the examiner's conclusion of obviousness is based upon improper hindsight reasoning, it must be recognized that any judgment on obviousness is in a sense necessarily a reconstruction based upon hindsight reasoning. But so long as it takes into account only knowledge which was within the level of ordinary skill at the time the claimed invention was made, and does not include knowledge gleaned only from the applicant's disclosure, such a reconstruction is proper. See *In re McLaughlin*, 443 F.2d 1392, 170 USPQ 209 (CCPA 1971). In the instant case, glass fibers are clearly envisaged, listed, disclosed and suggested..... etc. Its use is therefore obvious to those skilled in the art.

c) The prior art of YAGI does not teach or suggest use of glass fibers.

With respect to the above argument, the prior art of YAGI was utilized not for limitation of glass fibers in the tire tread but for the amount of aluminum hydroxide in a tire tread and this is the argument that the applicants should traverse.

d) Combination of references of SCHOLL and YAGI is not proper.

It is well settled that it is prima facie obvious to combine two ingredients, each of which is targeted by the prior art to be useful for the same purpose. *In re Linder* 457 F,2d 506,509, 173 USPQ 356, 359 (CCPA 1972).

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Katarzyna Wyrozebski whose telephone number is (571) 272-1127. The examiner can normally be reached on Mon-Thurs 6:30 AM-4:00 PM.
